

Subject Index

- Acridine orange fluorescence microscopy, application of, to experimental carcinoma of uterine cervix in mice, 403
- Adenomatosis, pulmonary, diagnosis of, from sputum by means of electronmicroscopy, 242
- Arterial blood, detection of malignant cells in, 341
- Ascitic fluid, cytologic diagnosis of, 175
- Aspiration biopsies of solid or cystic tumors, cytologic diagnosis of, 206
- Babes method: Pap smear or (Letter), 459
- Pap-test or? (Editorial), 173
- Bile ducts, method for studying material of, 332
- Biopsies, aspiration, of solid or cystic tumors, cytologic diagnosis of, 206
- Bladder tumors, urine cytology after treatment of, 288
- Blood: arterial, detection of malignant cells in, 341
- peripheral, differential diagnosis of megakaryocytes from cancer cells in, 91
- Breast, cytologic diagnosis of cancer of, 216
- Buccal mucosal cells, clinically normal exfoliated, nuclear and cellular size variations in, 80
- Cancer: accuracy of fluorescence microscopy for diagnosis of, 224
- breast, cytologic diagnosis of, 216
- cells in peripheral blood, differential diagnosis of megakaryocytes from, 91
- of colon, cytologic diagnosis of, 131
- endometrial, current efficacy of cervical-vaginal cytospin to detect, 431
- patient, treated, accuracy of cytologic diagnosis in, 3
- of stomach, early, proteolytic enzyme lavage method in detection of, 27
- of urinary tract: accuracy of cytologic diagnosis of, 186
- combined lactic acid dehydrogenase and cytologic examinations of urine in diagnosis of, 302
- uterine, place for colposcope in established cytologic screening program for (Editorial), 321
- Carcinogenesis, experimental oral, exfoliative cytology in, 85
- Carcinoma: of cervix: differentiation between intramucosal and invasive, by cytologic smear, 280
- in mice, experimental, application of acridine orange fluorescence microscopy to, 403
- in mice, influence of gonadal hormones on DMBA-induced, 274
- cytological changes of megakaryocytes in patients with, 343
- of the lung, oat cell, pitfalls in cytologic diagnosis of, 34
- microinvasive, of cervix, 14
- uterine, electronic data processing program for cytologic screening projects for, 385
- Cell: formation and exfoliation, aspects of (Letters), 164, 373, 376
- populations, normal, malignant, premalignant and atypical, from the human uterine cervix, quantitative cytochemical studies on, 45
- Cellular size variations, nuclear and, in clinically normal exfoliated buccal mucosal cells, 80
- Cerebrospinal fluid: cytologic diagnosis of, 141
- results of a sedimentation technique for cytology of, 234
- Cervical: cells: epithelial, fluorospectrophotometric analysis on, 61
- vaginal and, lipid patterns in, under hormonal stimulus, 263
- smears: deoxyribonucleic acid content of malignant cells in, 68
- vaginal and, in Hodgkin's disease limited to uterine cervix, 16
- Cervico-vaginal smear: current efficacy of, to detect endometrial cancer, 434
- Psammoma bodies in, 352
- Cervix: differentiation between intramucosal and invasive carcinoma of, by cytologic smear, 280
- DMBA-induced carcinoma of, in mice, influence of gonadal hormones on, 274
- experimental carcinoma of, in mice, application of acridine orange fluorescence microscopy to, 403
- Hodgkin's disease limited to uterine, 16
- microinvasive carcinoma of, 14
- quantitative cytochemical studies on normal, malignant, premalignant and atypical cell populations from human uterine, 45
- Chromatin elements, nuclear morphology and mid-body in human mitosis, 356
- Chromosome, abnormal, nuclear protrusion in human tumor associated with, 431
- Classifications in cytologic reporting, meaning of (Letter), 373
